

TakeCharge

It is my honor to recommend **Better Living Water** as a deserving recipient of grant funding in support of its mission to provide sustainable access to clean and safe drinking water for communities in need. I have had the privilege of observing the Foundation's work firsthand and can attest to its remarkable effectiveness, accountability, and compassion in addressing one of the world's most pressing humanitarian challenges.

Better Living Water's management and operational team has demonstrated exceptional leadership in implementing **clean water solutions** that are both **technically sound and community-driven**. Their programs are rooted in sustainability, innovation and love of humanity — focusing not only on drilling wells and installing purification systems but also on empowering local residents with the knowledge and tools to maintain these systems over the long term. Through this model, the Foundation ensures that every dollar invested produces enduring impact.

Equally important is the Foundation's **commitment to transparency and measurable outcomes**. Their detailed project reporting and rigorous follow-up practices reflect a high level of professionalism and stewardship of donor resources. Over the past 5 years, the organization has delivered safe water access to hundreds of people across the 10/40 zone significantly reducing waterborne diseases and improving health outcomes, educational opportunities, and local economies.

Better Living Water Foundation embodies the very best of what philanthropy can achieve when guided by integrity, innovation, and compassion. Grant funding will allow the organization to expand its reach, enhance its infrastructure, and bring life-changing resources to even more communities. I have full confidence that any investment in this Foundation will yield exponential social returns.

I wholeheartedly recommend Better Living Water Foundation for your support.

Regards,

Kendall Qualls
