To Whom it may concern,

The following is a letter of recommendation for Better Living Water an organization founded by Dale Kuklok. I have been a friend of Dale's for at least 10yrs. and He is presently on my board of directors of my small housing nonprofit (Renewed Dwellings, Inc.) which I have operated since 1993.

Dale has given much input and advice in my organization and I know his heart and desire provide the filtered water that many areas of the 3rd world needs. In any given situation the developed filter system may need to be adopted to the needs presented in the area. BE assured that Dale has the know how and information to work in any water situation to provide the right filtration.

Please consider you full attention the needs of Better Living Water and their financial needs to expand their Work in the area of water filtration in needy areas of the world.

Sincerely,
Larry Carlson, president
of Renewed Dwellings, Inc.
