

Better Living Water,

Thank you for providing a water filtration system that will provide sanitary, safe and sustainable water for the 165 students of Vida Christian Academy and the staff that serve them.

I have been involved in ministry in Honduras for more than 35 years and we have tried many different systems, but I can conclude that the system provided by Better Living Water is the best! It was easy to install, is inexpensive to sustain, and filters bacteria/parasites smaller than 0.9 microns.

Over 2 billion people live in water-stressed countries and drink contaminated water. The filters provided by Better Living Water need to reach ALL of these people. Safe water not only changes health outcomes for people, but it will boost economic growth and contribute greatly to poverty reduction.

Thank you for playing a role in providing equitable and safe access to water for so many people.
